

1.60 SCALE CARDSTOCK MODEL KIT

GOLIATH BUGS

BUG TYPES

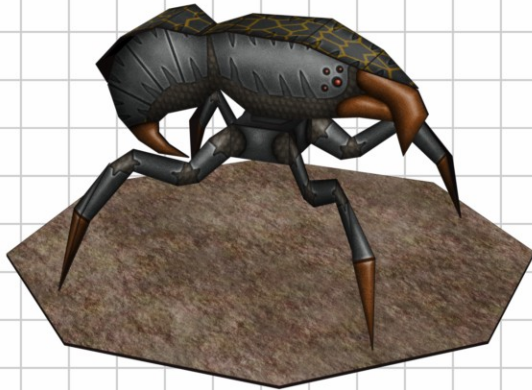

GOLIATH ZYGOTE

GOLIATH SCUTTLE

GOLIATH REAPER

These bugs are native to a desolate region of the planet Goliath. The Zygote fits on a 1x1-inch base, the Scuttler on a 2x2-inch base, and the Reaper fits on a 3x3-inch base.

The bases should be doubled in thickness on some scrap cardstock before cutting out.

To mount the bugs on their optional bases, apply a small dab of white glue to the bottom of each foot, and gently lay the bug into place on the base.

GOLIATH BUGS

ASSEMBLY INSTRUCTIONS

THE ZYGOTE

1. Cut out and fold the Zygote's legs as shown to the left.

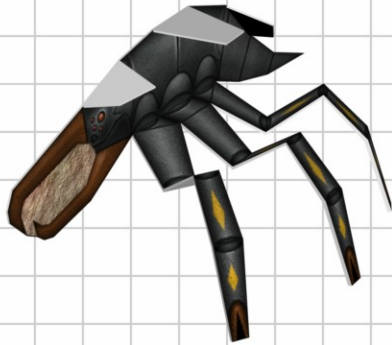

For best results, color the underside of the legs black before assembling the body.

2. Shape the carapace as shown to the left, then run a thin bead of glue along the "spine" at the top of the folded-up legs from Step 1. Press the carapace into place gently until the glue sets, which should only take a few seconds.

For best results, color the underside of the carapace black before gluing it to the body.

ASSEMBLY INSTRUCTIONS

THE SCUTTLE

1. Cut out the body sides and fold up the left side as shown to the left.

For best results, color the unprinted side of the legs black.

2. Repeat the process for the right side.

For best results, color the unprinted side of the legs black.

ASSEMBLY INSTRUCTIONS

THE SCUTTLE, CONTINUED

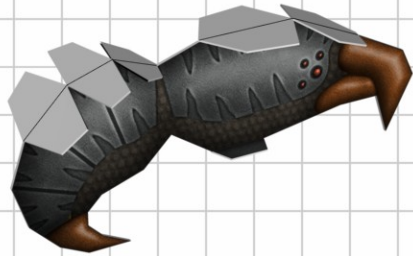

3. Glue the body sides together as shown to the left.

4. Cut out the carapace, fold it into shape, and then glue it to the top of the body as shown to the left.

For best results, color the entire unprinted side of the carapace black before gluing it to the body.

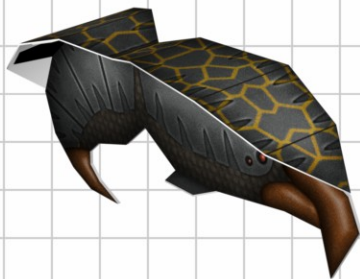

ASSEMBLY INSTRUCTIONS

THE REAPER

1. Cut out the body and fold it up, ensuring that the tabs along the top and the tabs at the bottom are folded outwards, as shown to the left.

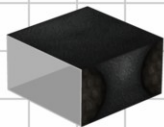

Note: the Reaper's body is contained within a partial frame. Remove the insets surrounding the bottom tabs before gluing the body frame together, and make sure you do not get any glue on the bottom tabs.

2. Next, cut out and shape the carapace as shown to the left. Glue it to the top of the body.

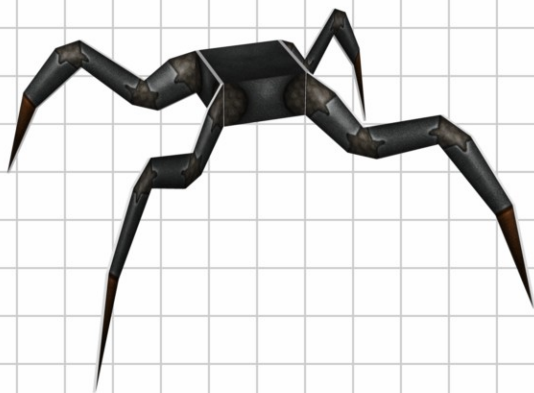

For best results, color the underside of the carapace black before gluing it to the body.

ASSEMBLY INSTRUCTIONS

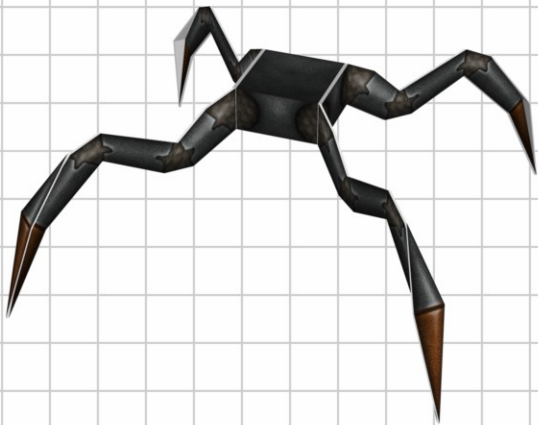

THE REAPER, CONTINUED

3. Cut , fold, and glue the hip block into the open-sided shape shown to the left.

4. Cut out the left and right leg pieces, then glue them to the open sides of the hip block as shown to the left.

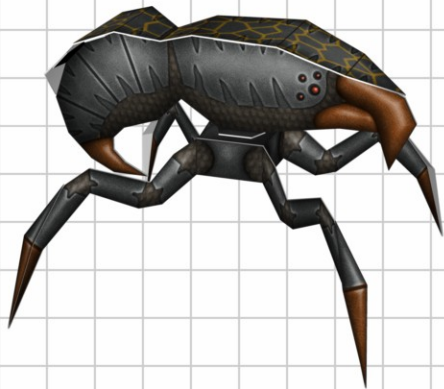

ASSEMBLY INSTRUCTIONS

THE REAPER, CONTINUED

5. Cut out the leg armor plates. Run a thin bead of glue along the outermost leg segments, then press each plate into place as shown to the left.

For best results, color the unprinted side of each leg armor plate black before gluing it in place.

6. Glue the body and leg assemblies together as shown to the left.
