

1:60 SCALE CARDSTOCK MODEL KIT

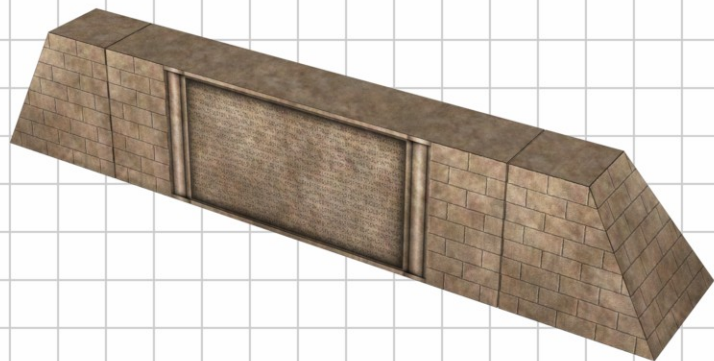

THE SHAHAD ZIGGURAT

# ASSEMBLY INSTRUCTIONS

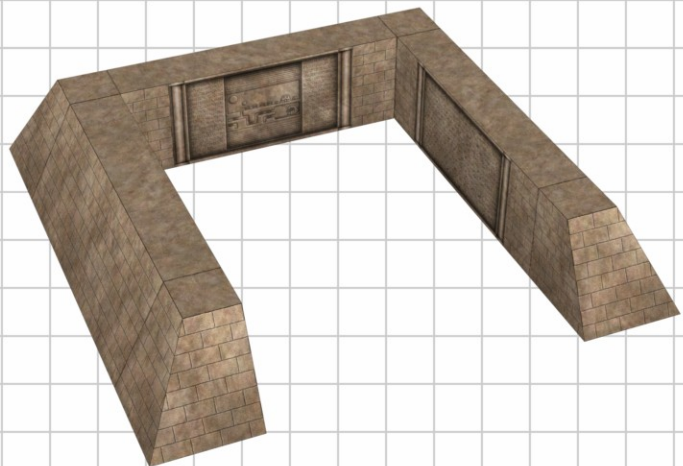

## ZIGGURAT WALLS

1. Glue together the doorway section and two corner sections as shown to the left. This forms the doorway wall.

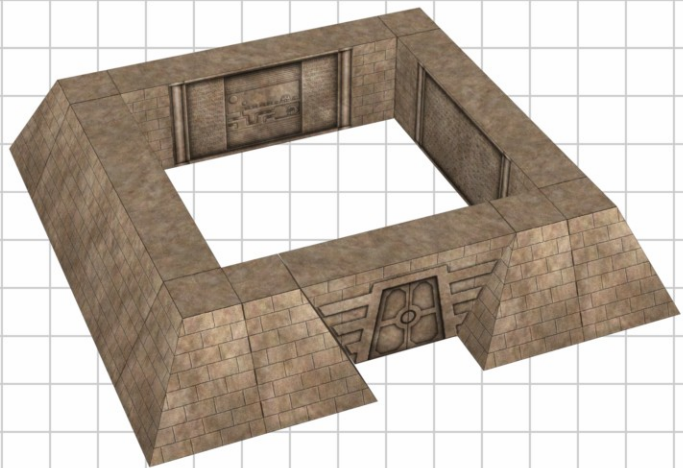

2. Glue together a Variation 1 wall section and two corner sections as shown to the left. This forms one side wall. Repeat this process for the second side wall.

# ASSEMBLY INSTRUCTIONS

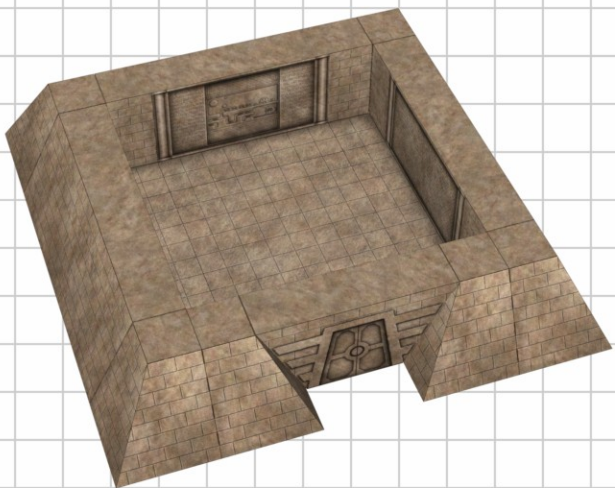

## ZIGGURAT WALLS, CONTINUED

3. Take the side walls you created in Step 2 and glue them to the Variation 2 wall section as shown to the left. This forms three sides of the first level.

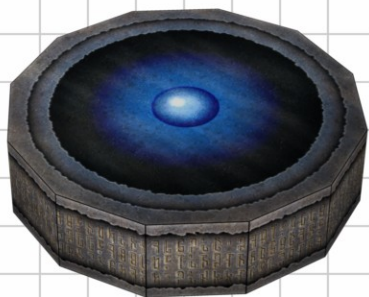

4. Take the doorway section you built in Step 1 and glue it into place as shown to the left. The wall ring for the first level is now complete.

# ASSEMBLY INSTRUCTIONS

## FINISHING THE FIRST LEVEL

5. Glue the center floor to the bottom of the wall ring as shown to the left.

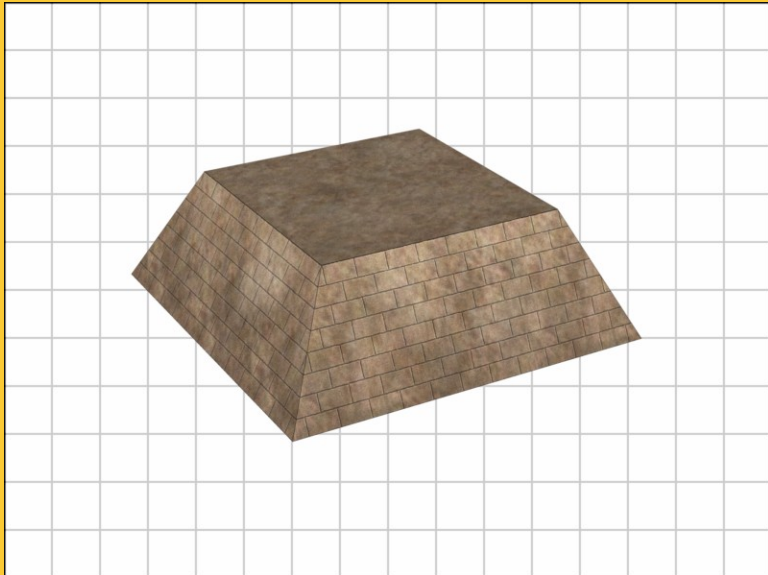

6. Next, build the Shahad Artifact. The artifact is a cylindrical volume that folds up into the shape shown to the left.

# ASSEMBLY INSTRUCTIONS

## FINISHING THE FIRST LEVEL, CONTINUED

7. Glue the Shahad Artifact to the center of the floor as shown to the left. This completes the interior of the ziggurat.

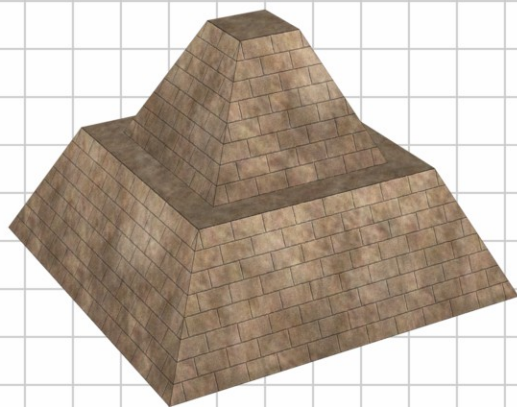

8. Next, build the roof block. The roof block is composed of four parts: the Level 2 bottom, the Level 2 part, and two side panels.

Start by gluing one edge of the Level 2 part to the bottom, then glue the other edge into place to form a loop.

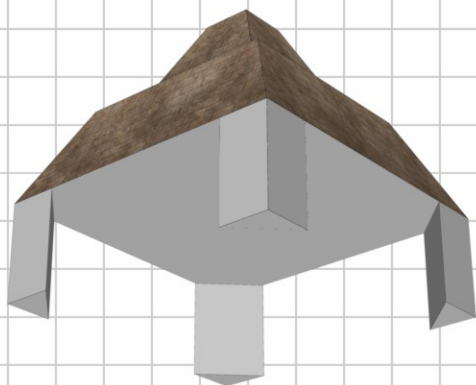

Close this loop off by gluing the side panels into place, and you'll have the shape shown to the left.

# ASSEMBLY INSTRUCTIONS

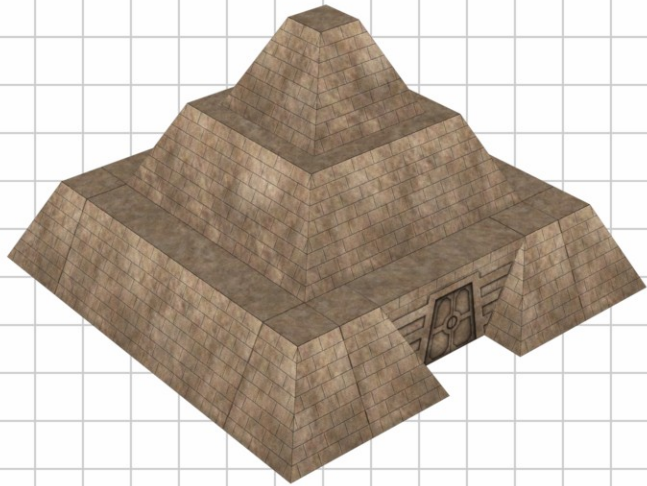

## THE SECOND LEVEL

9. Glue the ziggurat Level 3 piece to the top of the Level 2 block you created in Step 8, as shown to the left.

10. Next, build the four Level 2 supports and glue each one to a bottom corner of the Level 2 block as shown to the left. This completes the upper levels of the ziggurat.

# ASSEMBLY INSTRUCTIONS

## FINAL ASSEMBLY

11. The upper levels drop into place as shown to the left, and can be removed to gain access to the interior. The ziggurat is now complete.

12. Next, build the 4 obelisks that surround the ziggurat. Each obelisk is a 2 piece model composed of a base piece and an obelisk piece. Glue the obelisk piece to the base as shown to the left.

The entire ziggurat complex is now complete.
