SHELF UNIT WITH OPTIONAL INSERTS

FABRICATOR STATION

FABRICATOR CONTROLLER

The workshop props in this set are useful for lending a light-industrial atmosphere to your layouts. You can create simple workshops, their attached storage areas, fabrication areas, or combine them with other prop sets to create other kinds of rooms.

AMBIENT ELEMENTS

ASSEMBLY INSTRUCTIONS

WORKBENCH AND LOCKERS

The workbench is a one-piece combination box and fold-over part, and builds up into the shape shown to the left.

The lockers are a basic box form, and build up into the shape shown to the left.

ASSEMBLY INSTRUCTIONS

TOOL CABINETS AND WORK TABLES

The tool cabinets are basic box forms, and build up into the shape shown to the left.

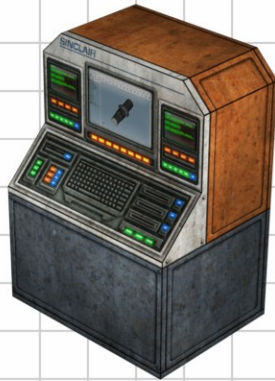

The worktables are composed of two parts: a flat rectangular fold-over part for the tabletop, and an angled box form for the base. Glue them together as shown to the left.

ASSEMBLY INSTRUCTIONS

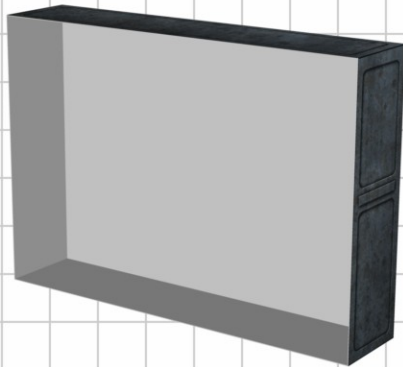

FABRICATOR AND CONTROLLER

The fabricator station is another basic box form, and builds up into the shape shown to the left.

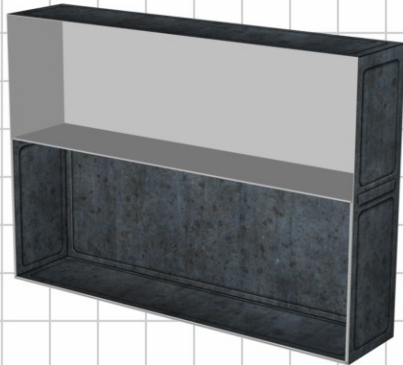

The controller station is a cylinder form, and builds up into the shape shown to the left.

ASSEMBLY INSTRUCTIONS

SHELF UNITS

1. Fold up and glue the shelf back into the open-ended shape shown to the left.

2. Fold together the lower shelf interior in the same way as the shelf back. Unlike the shelf back, the lower shelf interior does not have glue tabs. Apply glue to the unprinted side of the bottom and side flaps of the lower shelf interior, then press it into place as shown to the left.

ASSEMBLY INSTRUCTIONS

SHELF UNITS, CONTINUED

3. Repeat the process for the upper shelf interior.

Optional: fold up and glue the upper and lower shelf inserts into the box forms shown to the left. Apply glue to the back of the inserts, then press them into place.

The shelf can be left empty, partially filled with inserts, or completely filled as shown to the left.
