

PAYLOAD OPTIONS

TROOP TRANSPORT

UTILITY TRANSPORT

CARGO HAULER

MEDEVAC SHUTTLE

MODULAR CARGO BAY

Each of the payload options shown above is glued to a floor insert to form a payload module. The entire module is inserted through the open ramp of the dropship and simply dropped into place, no gluing necessary. In this way, you can swap out payload options to your heart's content. You are not limited to the four examples shown above—you can combine any of the included payload items in any way you desire to create all-new floorplans of your own.

PAYLOAD ITEM MANIFEST

Removable floor insert
